The international conference
2012 Contaminated Site Management in Europe
CSME
Sustainable Approaches to Remediation of Contaminated Land in Europe
SARCLE

will be held at the ENSIC
(University of Lorraine, Nancy, France)
October 22-24, 2012

Call for abstracts: June 30, 2012 (500 words)

Website: www.redoxtech.com
Correspondence: H. Al-Ekabi hussain@alekabi.com
Chair: Pr M.O. Simonnot

Sponsor: Redox Technologies Inc.

From Paris Charles de Gaulle (CdG) airport
- High speed train to Lorraine TGV station + shuttle or taxi to Nancy
- RER to Paris Gare du Nord + high speed train from Paris Gare de l’Est to Nancy

From Paris Orly airport
- Orlyval railway + connect to RER (station Antony) to Paris Gare du Nord + high speed train from Paris Gare de l’Est to Nancy

From Luxembourg airport
- Shuttle or taxi to Luxembourg station and train to Nancy

Train schedules: http://www.voyages-sncf.com/
For Paris Metro/RER map: http://www.ratp.fr/
From Gare du Nord to Gare de l’Est: 10 min walk

CSME: this conference is directed at **understanding and effectively managing the complex nature of sites contaminated with organic and inorganic constituents**. Effective contaminated site management necessitates balancing a number of overlapping and interrelated factors including technical, legal, regulatory, societal and business (economic) issues. Contamination creates impacts; impacts drive liabilities. There have been significant advancements in our understanding of contaminated sites and in our abilities to effectively manage them. This conference seeks to provide a comprehensive forum to discuss these advancements. The conference will have three primary themes:

1. **Tools for Defining/Elucidating Impacts and Liabilities,**
2. **Tools for Mitigating Impacts to Soil, Sediments and Water**  
3. **Strategies for Managing Contaminated Properties**

SARCLE: **sustainability in remediation is an evolving risk management and regulatory concept.** Currently, it is viewed and applied as a **guidance principle** and not as a specific regulatory requirement. The tools to assess and quantify sustainability as a factor in evaluating remedial options are still being developed. One expression of sustainability is the use of “green” technologies. The purpose of this conference is to provide a forum to discuss policy, tools, technologies, and applications relating to the development of sustainability as a core value in remediation practices. The conference will have four primary themes:

1. **Policy, Regulations and Guidance for Sustainable Remediation,**
2. **Sustainability Metrics,**
3. **Green Technologies,**
4. **Case Histories**
